To,
The Dean,

R.T.M.N.U, Nagpur.

Subject: Inputs for the forthcoming Curriculum Revision.
Respected Sir,

Kavikulguru Institute of Technology and Science, Ramtek has a well established Feedback system that includes the feedback and the recommendations from various stakeholders. As a part of this, the Institute collected feedback on curriculum prescribed by the University from students, faculty, alumni and employers. Based on the analysis of the collected feedback, following are the suggestions highlighted by the stakeholders that need to be considered while designing the forthcoming curriculum to improve the quality of education and to ensure that the budding engineers are able to meet the industry requirements:

1. Advanced technologies and the skills sets required in the industry can be incorporated in the curriculum to enhance employability of engineering graduates.
2. Total number of contact hours can be reduced to some extent to provide scope for self learning, hard and soft skills development etc.
3. More optional subjects with laboratory work especially in software can be included in the curriculum for providing flexibility in selecting the courses.

We hope the above inputs would be of use to the syllabus revision committee for curriculum enrichment. It will be our privilege to be a part of the syllabus revision committee. We are thankful to you and look for your valuable support in future.
